# **Modular Power Distribution Unit**

The MPDU series is designed to suit the operational requirements of next-generation data centers. MPDU is a Sustainable, Upgradeable and Maintainable (SUM) PDU system which can be re-configured or upgraded hot without affecting the operation of a data center.

### **APPLICATION**

MPDU is widely applied to the data centers of industries like network communication, telecom, electric power, finance, insurance, aerospace, transportation, information processing, education, medical, E-government etc.

## **| CHARACHTERISTICS**

- Hot Swap NMC Module
- Hot Swap Socket Module
- Large LCD Screen
- Flush Mount Hydraulic Circuit Breaker
- High-density Outlet Configurations
- Environmental Monitoring
- Self designed locking receptacles

### **I MODELS**

Monitored PDU (MA)

Per Port Monitored PDU (MB)

Switched PDU (MC)

Per Port Monitored Switched PDU (MD)
