

# NPS Structured Cabling System Warranty

## B2 – INSTALLATION DETAILS

Link type	No.of links
(*), (**)	
List continues on attached page(s) YES   NO    (*) Cabling type (for example U/UTP or U/FTP) and Category/Class level (for example 5e/6/6A or Class D/E/E <sub>A</sub> ). (**) For optical fiber links state SM (OS1, OS2), MM62.5 (OM1, OM2), MM50 (OM1, OM2, OM3, OM4).	

! Note – A “link” is defined as 4-pairs copper or single fiber terminated at both ends with an appropriate connector. For example, a twelve-core fiber cable is counted as twelve links (in case all fibers are terminated at both ends).
